Background to this Proposal.

This proposal proposes to put an end to the systematic commission of crimes against humanity in Venezuela, Cuba, Nicaragua and Bolivia, where citizen sovereignty and its democracies have been usurped by criminals against humanity and to stop the narco-terrorist and organized crime invasion in the democratic countries of Latin America, to put an end to acts of war, terrorism and the destabilization of the continent's democracies.

The criminal states against humanity, narco-terrorist and organized crime of Cuba, Venezuela, Nicaragua and Bolivia, systematically commit crimes against humanity, facts documented by national and international NGOs, complaints submitted to the international criminal court and in continental organizations, have evidenced links with organized crime and support for narco terrorism. Cuba and Venezuela lead together with the allied criminal states, organized crime and international narco terrorism of FARC, ELN, Hezbollah, Hamas, Taliban and their armed and intelligence gangs an invasion of territories, acts of scorched earth war, cyberaggression and destabilization of the democratic nations of Latin America, most of these facts, we document them in our magazine [How to Protect the Democracies of the XXI Century](#). The democratic nations of Latin America have been greatly affected by this criminal interference and invasion, in addition to what all the nations of the world have suffered from COVID-19, especially Colombia, Ecuador and Chile, to continue impunity for crimes against humanity, criminal acts of war and terrorism committed by Cuba and Venezuela, the collapse of all democracies in the hemisphere in a decade

is evident. Although democracies still survive, their human rights institutions have been infiltrated by bribes, to free criminals who commit acts of vandalism and terrorism from criminal charges and punish the security and public order forces that arrest them, their economies and development have been affected, which causes social discontent, which is exacerbated by the invading criminal states, through cyberaggression to provoke violent protests, which they use to overlap their acts of scorched earth war, of burning infrastructure, destroying SMEs (the main sources of employment), shops and banks and acts of terrorism of burning industries, residences and even families in their homes to leave territories, to be taken by narco terrorists and organized crime, orchestrated by embassies of Cuba and Venezuela, facts documented in our blog in different [articles](#). The democratic nations of the hemisphere affected by COVID-19, by these acts of war and terrorism, must attend to the exodus of citizens from Venezuela, Cuba, Nicaragua and Bolivia, the largest number of displaced by violence are from Venezuela, more than 6 million Venezuelans have been forced to leave their homes by the holodomor, health crisis and lack of medical care, repression and narco-terrorist violence, daily 200 people leave the Venezuelan borders, mainly to developing countries, such as Colombia, Ecuador, Chile and Uruguay, for which we promote the construction of sustainable [shelters](#), we advise democratic nations to achieve sustainable development, according to their main problems determined by their geographical location, You will be able to see a brief description of these projects on our [website](#).
